

Mechanical Features

The X Ray photograph gives the relative location of the fan, brush, wheels, etc. The small round insert shows the sturdy worm-gear mechanism which drives the fan.

These views cannot fail to emphasize the simplicity of the working parts of the Vacuette. The elimination of unnecessary parts guarantees *Constant Service*. It means durability as well as absolute freedom from all mechanical troubles.

A Vacuum cleaner should be efficient and at the same time be durable, convenient, economical and easy to operate. The Model C Vacuette possesses all of these virtues and yet it costs less than ordinary cleaners. A test will prove these assertions, and our nearest Distributor will be glad to demonstrate the Vacuette in your home—*FREE*

Model C

THE New Model C Vacuette Suction Sweeper was first introduced in 1921, and it has many wonderful improvements over the other successful Vacuette models. It is far superior to and radically different from all other vacuum cleaners. Don't buy a vacuum cleaner until you have seen the New Model C Vacuette, with its easy gliding and deep cleaning qualities. Look at the name plate on the front of the machine to make sure it is the New Model C Vacuette.

The Wonderful Worm Gear

There is *but one gear* in this mechanism as compared to other machines having many gears. This gear is made of the finest material obtainable (Non Gran Bronze) and is machined, while other cleaners have die-cast gears. (Ask any good mechanic what this means.)

Quietness—Ball Bearings

Notice how quietly the Vacuette runs. Compare it to the noisy motor of electric machines, and the rattling of other non-electric cleaners. The extreme quietness and ease of operation is produced by the use of especially designed ball bearings of the highest quality.

Revolving Bristle Brush

The Vacuette has a 12-inch positive gear-driven revolving bristle brush, (no belts to slip and wear out) which absolutely picks up all lint, ravelings, hair, etc. Remember, only a *revolving* brush will do this work efficiently. This brush cannot hurt the rugs, being made of soft, pliable, bristles, just strong enough to gently wave the nap of the rug back and forward, which helps to loosen the embedded dirt. And don't overlook this—the Vacuette brush is easily lifted out and replaced without the use of a single tool. Also note the size of the brush, it's strength and quality.

Strong Powerful Suction

The fan revolves at high speed, creating a strong, powerful suction, which absolutely draws all of the embedded grit, sand and dust out of the rug.

Strength and Durability

The New Model C Vacuette is a one-piece aluminum casting, giving it wonderful strength and durability. An exclusive feature is that all steel parts are made rust proof by Parkerizing.

Pistol Grip on Handle

You will notice that the New Model C Vacuette has a "pistol" grip which fits comfortably into the palm of the hand.

Under Low Furniture

The Vacuette is built especially low and will glide conveniently under heavy furniture, eliminating the necessity of moving it about.

No Electric Wires or Plugs

There are no wires, plugs or switches on the Vacuette, for it runs *without* electricity—no electric motor to get out of order, or to oil; no fuses to be blown out; no danger of shocks; no trailing, entangling wires. The Vacuette has the *convenience of an old fashioned carpet sweeper*, yet it has the *efficiency of the highest priced electric cleaner*.

Economy

Compare the real values—the Vacuette gives you *better service*, yet costs only one-half as much as the best electric cleaners. Remember! There is no electric current being used—no wires, plugs, switches, fuses or motor to replace or repair—absolutely no upkeep expense; in short, there is no bother or expense—*just results*.

An "Everyday" Cleaner

Dirty, grit-filled rugs wear out quickly, and only the use of a suction sweeper *daily* will keep the rugs free from grit.

Free Demonstration

Phone or write for free demonstration *NOW*. This in no way obligates you to buy. The Model C Vacuette is fully guaranteed by The Scott & Fetzer Co. Mfgs., Cleveland, O.
