

AC-U-ETTE Electric Utility vacuum cleans through the nozzle — dislodges dirt by air blast through the nozzle — and applies moth repelling crystals when and where you want them through the nozzle by reversing the flow of air through the nozzle instantly without even stopping the motor! No extra attachments are needed.

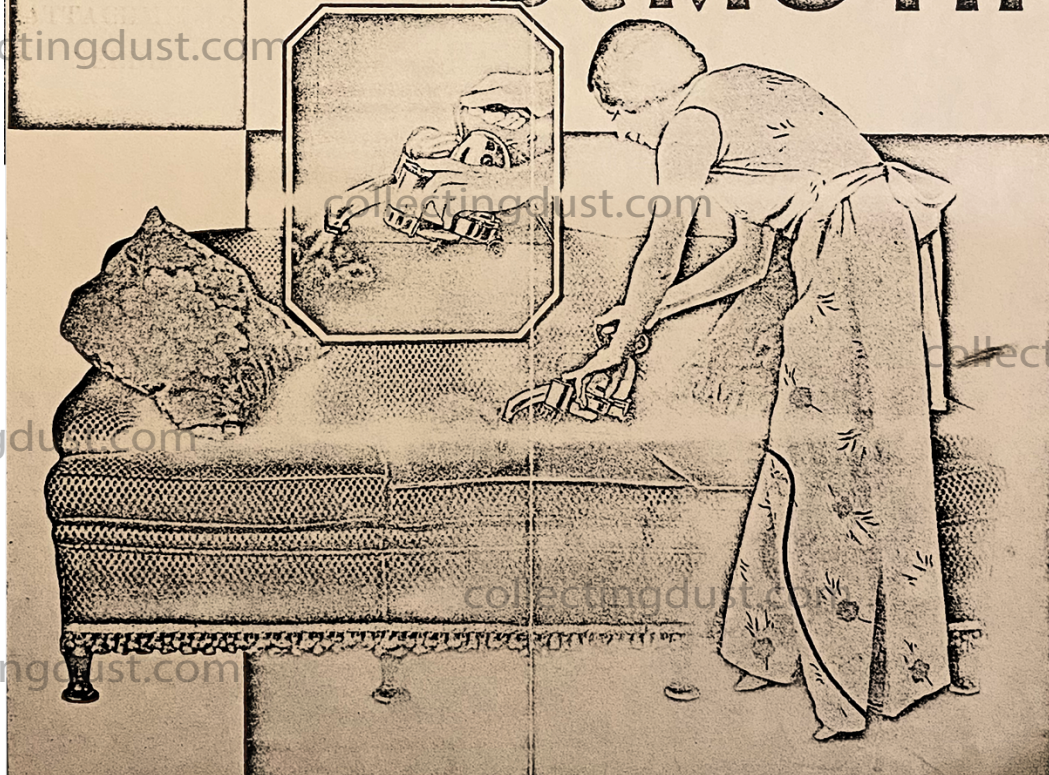

Vac-u-ette Utility is the handiest, most powerful, and most practical hand cleaner ever developed. Light ( $4\frac{1}{2}$  lbs.), compact, easy to use, Vac-u-ette Utility also incorporates a simple, sanitary way to empty the dust bag without removing the bag from the machine; eliminates the scattering of dust and any necessity of soiling the hands in disposing of the collected dirt — and the bag is placed so it will not rub against the arm or clothing. You never saw such a surprising array of better and more practical features built into one device.

Fully Protected by Patents Pending

Dirt emptied through built-in trap.

and immediately **DEMOTH**

The novel yet intensely practical Vac-u-ette Utility takes the place of vacuum cleaner attachments entirely, and unlike all other cleaners needs no attachments for its complete and efficient operation. It cleans and demoths furniture, drapes, bedding, clothing, stair carpets, auto interiors, and countless other things in the home. Its long cord affords a wide cleaning range in any part of the house.

The makers fully guarantee Vac-u-ette Utility. The labor-saving convenience and efficiency of Vac-u-ette Utility cannot be appreciated unless you actually see it in operation. Ask for free demonstration in your home today.
