

Service Tips For Your Ball Bearing Brush Roll

Dear Proud Kirby Owner,

Your new Kirby Legend II vacuum cleaner has been equipped with a newly designed ball bearing brush roll. This brush roll is precision made and should be handled with care. The end caps of the brush roll rotate independently so it is important that the brush roll be installed with the screw heads facing the openings in the rug plate (see Illustration). Should the end caps come off during servicing of the brush roll they can easily be replaced by following the directions engraved in the roll as to which end they belong to (see Illustration).

If you have any further questions or comments regarding your new ball bearing brush roll please contact your local Kirby Distributor for assistance. We hope that you will enjoy this improvement to your new Kirby.

Sincerely,

Kirby World Headquarters
